

**Figure 4.2.1.** The extent to which CMS activities in general are regarded useful. Percentages.

### To what extent various CMS activities are regarded as useful in general

All respondents

*NOTE: The above figure shows the percentages of responses for each of the four types of activities and for each of five response options. The total number of responses for each of the four types of activities is indicated in the figure text (n), each "n" corresponding to 100% of the shown responses for an activity. The non-responses including the "do not know" answers, are not included in the n-numbers or in the percentages, but they are indicated in the tables in annex 4.1 together with the numbers for each of the four types of activity and for each of the response categories.*
