

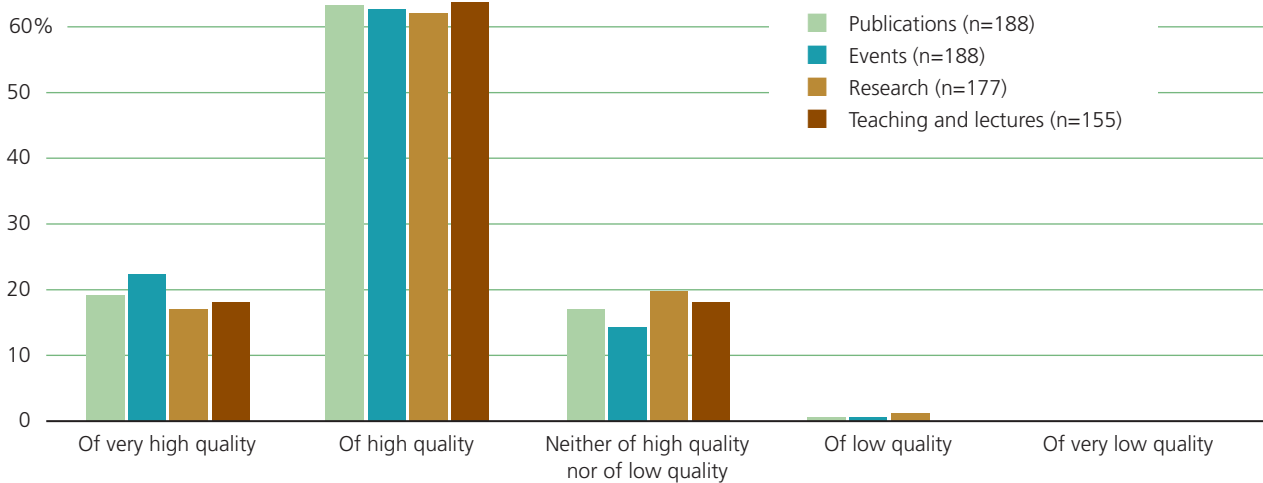

**Figure 4.2.3.** The respondents's view on the quality of CMS's activities. Percentages.

### Respondents view on the degree of quality of various CMS activities

All respondents

*NOTE: The figure shows the percentages of responses regarding quality for each of the four types of activities and for each of five response options. The total number of responses for each of the four types of activities is indicated in the figure text (n), each "n" corresponding to 100% of the shown responses for an activity. The non-responses, including the "do not know" answers, are not included in the n-numbers or in the percentages, but they are indicated in the tables in annex 4.2 together with the numbers for each of the four types of activity and for each of the response categories.*
