

Figure 4.3.4. The extent to which the respondents have made references to works of CMS. Percentages.

To what extent do the respondents refer to the works of CMS

All respondents

NOTE: The figure shows the percentages of responses to two questions regarding respondents' referencing to work of CMS for each of five response options. The total number of responses for each of the four types of activities is indicated in the figure text (n), each "n" corresponding to 100% of the shown responses for an activity. The non-responses, including the "do not know" answers, are not included in the n-numbers or in the percentages but they are indicated in the tables in annex 4.6 together with the numbers for each of the two questions and for each of the response categories.
